Introduction to Open Educational Resources (OER)

Michael Paskevicius

Learning Technologies Application Developer
Centre for Innovation and Excellence in Learning

2009-2012

 by [dkscully](#)

What does the term open educational resources (OER) mean to you?

Open Educational Resources

Open Content / Open educational resources (OER) / Open Courseware are educational materials which are **discoverable** online and **openly licensed** that can be:

Sharing beyond the classroom

Traditional sharing of teaching materials

Sharing educational resources as OER

Additional considerations:

- Clearing of **copyright** issues
- **Formatting** for web and accessibility for reuse
- Addition of **descriptive metadata**
- **Publishing in repository, referatory or on the web**

Educator

Creates

Learning activity
or resource

Shares
with students
and other
faculty

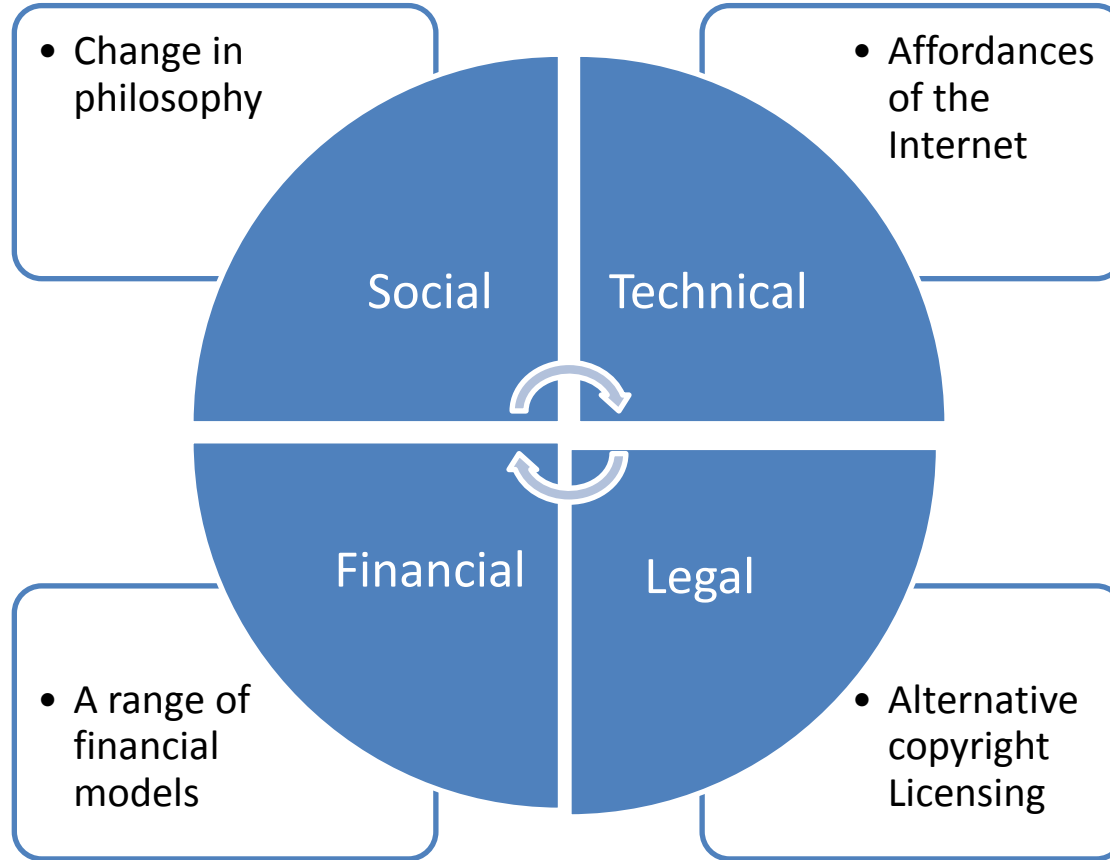

Designated as
OER on web

Available to other
faculties, students and
institutions.

Other educators can now
discover and reuse.

What has enabled OER?

Change in philosophy towards an “Open Movement”

Open Society

The idea of OPEN in ... Open Society

Our Water Commons
Our Water Commons seeks to transform societal decision making for water stewardship towards participating elements, community centered systems that address regional sustainability as a strategy.
<http://www.watercommons.org/>

Web of Change
Web of Change is a global community of people who are working to transform society. They are working for the transformation of organizations, and the world.
<http://www.webofchange.com/>

OPEN
Open Society is a global community of people who are working to transform society. They are working for the transformation of organizations, and the world.
<http://www.opensociety.com/>

Open Source Software

The idea of OPEN in ... Open Source Software

OpenOffice.org *the free word processing suite*

Open Source

Sakai

Drupal

Java

Open Data

infochimps

Free our data

Open Data Foundation

Open Access

The idea of OPEN in ... Open Access

SHERP+RoMEO
The SHERP+RoMEO service provides a listing of published research outputs with the aim to address publishing work-up lists.
<http://www.sherpa.ac.uk/>

OpenDOAR
OpenDOAR is an authoritative directory of academic open access repositories.
<http://www.openaccess.org/>

DDA
The Directory of Open Access Journals (DOAJ) has, further, quality controlled journals and archiving projects.
<http://doaj.org/>

The Open Movement

Open Science

The idea of OPEN in ... Open Science

The Open Science Project
is dedicated to writing and releasing free and Open Source scientific software.
<http://www.openscienceproject.org/>

Open Access
The Open Access Project aims to promote discovery and collaboration data-intensive research by providing a computing facility and access to open access journals, preprints and shared resources to support computation at all scales.
<http://www.openaccessproject.org/>

The Open Access Project
was founded to foster scientists and the public alike in developing a comprehensive database of research data from researchers to investigate questions of disease function and evolution.

Affordances of the Internet

A range of financial models

- **Donor funding** – e.g. Hewlett Foundation
- **Marketing budget** – e.g. Open University
- **Commission** – e.g. MIT and Amazon
- **Endowment** – e.g. Stanford Encyclopedia of Philosophy
- **Membership** – e.g. Sakai Consortium, OCWC
- **Government** – e.g. UK £7.8 million grant, US commitment to OER

What happens when you create and share something on the internet?

Your work is automatically protected under copyright!

Online **DOES NOT EQUAL** openly
licensed!

Recap: What makes an OER?

- Educational **curriculum, materials or mixed media**
- **Discoverable** online as they are **shared** freely and openly
- Openly **licensed** (usually Creative Commons)
- Can be **legally used by anyone** to **repurpose/improve and redistribute**

OPEN VERSUS CLOSED WEB RESOURCES

The origins of OER: [MIT OpenCourseWare](#)

The **Court of Chancery** was a court of equity in England and Wales that followed a set of loose rules to avoid the slow pace of change and possible harshness (or "inequity") of the **common law**. The Chancery had jurisdiction over all matters of equity, including trusts, land law, the administration of the estates of lunatics and the guardianship of infants. Its initial role was somewhat different, however, as an extension of the **Lord Chancellor's** role as Keeper of the King's Conscience, the Court was an administrative body primarily concerned with **conscientious law**. Thus the Court of Chancery had a far greater remit than the common law courts, whose decisions it had the jurisdiction to overrule for much of its existence, and was far more flexible. Until the 19th century, the Court of Chancery could apply a far wider range of remedies than the common law courts, such as **specific performance** and **injunctions**, and also had some power to grant damages in special circumstances. With the shift of the Exchequer of Pleas towards a common law court, the Chancery was the only equitable body in the English legal system. [\(more...\)](#)

Police Raid School Teacher for Uploading History Book for Students

 Andy
A teacher received a huge shock last week after uploading a copy of a book to his website that offers free educational resources for students. The Latvian publisher behind the work, a \$4.00 history book, complained to the authorities which resulted in the teacher being raided by the police. During interrogation the teacher learned that his mistake could cost him dearly – two years in jail, forced labor, or a fine.

 May 20, 2013
 201
 piracy
 Print
While the online sharing of music has been widespread for close to a decade and a half, the sharing of books has only gathered real traction in the past few years.

When it came to legal action to prevent sharing the music industry led the way but even now, book publishers – Wiley aside – seem generally unwilling to follow the example. However, there are companies prepared to make uploaders suffer, even those with no malicious or commercial intent.

Pāvels Jurs is a teacher in Latvia who operates a website where children can research history topics, see presentations and find other learning aids. Jurs created the site so that children from poor families can still have access to education. According to Latvian media, Jurs even received recognition from the Ministry of Education for his efforts.

Last Thursday, however, Jurs was leaving home to go to school and found himself confronted by four police officers from the Economic Crime Bureau. They proceeded to search Jurs' home and confiscate the computer he uses in his teaching job. He was arrested and subjected to two hours of interrogation during which he learned he had committed a serious offense that could result in a two year jail sentence.

Jurs' crime was to upload a scanned copy of the high school history book "Vēsture Vidusskolai" to his website, an act which drew the ire of publisher Zvaigzne ABC and an official complaint earlier this year.

The publisher currently sells the book for the princely sum of \$4.00 and it appears that Jurs had previously held discussions with its author but there was a misunderstandings over what

Bloggers Beware: You CAN Get Sued For Using Pics on Your Blog - My Story

So today I'm forgoing the usual Fri-Me-In Friday post to talk about something that I've been wanting to blog about for a while but couldn't until the situation was wrapped up.

For those of you who are super observant, you may have noticed some changes on my blog over the last few months. Tumblr posts went away. Fiction Groups disappeared. I deleted most of my Pinterest boards. The Boyfriend of the Week has changed format. And all my previous posts from the past three years--all 700 of them--now have new photos on them.

Photo by rex one

Why is that? What happened?

Well, you've probably figured it out from the title, but it's because I've been involved in a case

OpenStax College Releases First Two Books!

The first two books in OpenStax College's series of high-quality free textbooks have been finished, reviewed, and released! [College Physics](#), an introductory algebra-based college text, and [Introduction to Sociology](#), a one-semester introductory text, are both available in several formats, including pdf, epub, and on the web at Connexions. Both books are slated for print publication in July at a low cost, to expand accessibility for learners everywhere. Through our partnerships with companies and foundations

Rethink Education

Academic Earth believes everyone deserves access to a world-class education, which is why we continue to offer a comprehensive collection of free online courses from the world's top universities. And now, we take learning outside the classroom by offering original, thought-provoking videos. Our goal is to spark intellectual curiosity and start a conversation. After all, only through questioning the world around us, can we come to better understand it.

[Introduction to Psychology](#)

Dr Charles Stangor, University of Maryland

Charles Stangor wrote *Introduction to Psychology* to help students organize their thinking about psychology at a conceptual level. The text utilizes the dual theme of behavior and empiricism to make psychology more relevant to introductory students. The author does not expect all students to remember the details five or ten years from now, but he does hope that they will remember that psychology matters because it helps us understand behavior and that our knowledge of psychology is based on empirical study.

[Introduction to Sociology](#)

Introduction to Sociology is intended for a one-semester introductory sociology course. Conceived of and developed by active sociology instructors, this up-to-date title will be ready for review and pilot in March 2012. This online, fully editable and customizable title includes sociology theory and research; real-world applications; simplify and debate features; and learning objectives for each chapter.

Open access research: DOAJ

The screenshot shows the DOAJ website interface. At the top left is the DOAJ logo with the text "DIRECTORY OF OPEN ACCESS JOURNALS". To the right is the "SPARC LIBRARY AWARD 2009" logo. Below the header is a navigation menu with options: Search, Browse, Suggest a journal, About, Support DOAJ!, Statistics, and Contact. The main content area is divided into "Journals" and "Articles" sections, each with a search box and a "Search" button. The "Articles" section includes a note: "More than one word in a field will be treated as phrase." and a search filter dropdown set to "All Fields". Below the search filters are radio buttons for "and", "or", and "not". The right sidebar contains a "NEWS" section with several dated entries, a "News Archive" link, and a "DOAJ AS OF TODAY" section with statistics: 8088 journals, 3967 journals searchable at article level, and 883180 articles. At the bottom of the page is a footer with logos for LUND UNIVERSITY, Dovepress, INASP, Springer, National Library of Sweden, BioMed Central, and Copernicus Publications.

B.C. Open Textbook Project

NEWS RELEASE

Ministry of Advanced Education, Innovation and Technology

For Immediate Release
2012AEIT0010-001581
Oct. 16, 2012

B.C. to lead Canada in offering students free, open textbooks

VANCOUVER – British Columbia is set to become the first province in Canada to offer students free online, open textbooks for the 40 most popular post-secondary courses.

Up to 200,000 B.C. students each year could benefit from this move under B.C.'s Families First Agenda, saving each student hundreds of dollars a year or more on textbooks – money that can go toward other learning supplies or living expenses.

An open textbook is typically published under an open licence and can be read online or downloaded at no cost. If a printed copy is desired, the book is made available for printing at a fraction of traditional textbook costs. Because the open textbooks are digital and open, they can be modified and adapted by instructors to fit different classes.

Open textbooks are part of a growing movement worldwide supporting Open Education Resources, which takes advantage of the Internet (making information sharing easier) and open licences (which extend the rights to use, reuse, revise and share material).

Government will work with post-secondary institutions in implementing an open textbook policy in anticipation they could be in use at B.C. institutions as early as 2013-14, supporting students taking a variety of courses in areas like arts, sciences, humanities and business.

The open textbooks are expected to be created with input from B.C. faculty, institutions and publishers through an open Request for Proposal process co-ordinated by BCCampus, a publicly funded organization that aims to make higher education available to everyone through the smart use of collaborative information technology services. Educators will continue to have the option of using other teaching materials in developing curriculum and teaching classes.

This is the latest step announced under the Families First Agenda for British Columbia, which helps make life more affordable, support vulnerable families and keep communities safe.

http://www2.news.gov.bc.ca/news_releases_2009-2013/2012AEIT0010-001581.htm

Call for reviews: <http://open.bccampus.ca/call-for-reviewers/>

“B.C. is leveraging 21st century-technologies and licensing to ensure its citizens have affordable access to high-quality post-secondary textbooks. Open licensing on publicly funded content ensures the greatest impact for the public dollar.”

Attribution made “easier”

- Browser plugin lets you know when you are on a webpage which uses Creative Commons
- Click icon to access attribution text
- Add on available for Firefox, Chrome, Opera, Wordpress and Drupal

give credit where credit is due.

The problem: Creative Commons licensed content is awesome, but attributing it properly can be difficult and confusing. The first rule for re-using openly licensed content is that you have to properly attribute the creator. There are specific requirements for what needs to go into that attribution, but those requirements can be confusing and hard to find.

The solution: A simple tool everyone can use to do the right thing with the click of a button. That's why we're building Open Attribute, a suite of tools that makes it ridiculously simple for anyone to copy and paste the correct attribution for any CC licensed work. These tools will query the metadata around a CC-licensed object and produce a properly formatted attribution that users can copy and paste wherever they need to.

CHED Computer Literacy Guides

- IEEE UCT chapter use the openly licensed CHED computer literacy materials to support training in a computer lab donated to a high school

SCHOOL COMPUTER LAB PROJECT

UCT IEEE student members are very excited as the Chair of the EBE ICT Committee, Associate Professor Brandon Collier-Reed, donated 20 PCs to their School Computer Lab project.

In their attempt to find a deserving school in Cape Town, UCT IEEE approached Khanya, the Western Cape Education Department-backed initiative that aims to provide ICT infrastructure to all the schools in the West-

ern Cape. Khanya has been running since 2002 and has made a lot of progress installing computer labs for schools in the Western Cape.

Nana-Ampofo Ampofo-Anti, Blessing Katsande, Erica Le Roux, Joyce Mwangama (Chair) and David Oyedokun

Khanya's liaison officer, Ingrid Graham, suggested that they donate the computers to a school that already has a computer lab but, because of large student numbers or the age of their current computer lab, would be in need of these additional computers. She suggested three schools which some of the committee members visited and after careful consideration they decided to donate the PCs to Oaklands High School.

This project is an IEEE EPICS-High project run by the UCT IEEE Student Branch Projects Committee. The confirmed partnerships for the project include Khanya and SHAWCO.
